Preparing the Practically Perfect Poster

Heather Canavan
Linnea Ista

In preparation for the upcoming NMAVS Symposium, which is a GREAT venue for students to present their work, Profs Canavan and Ista will present a workshop on the ins and outs of posters. We will provide practical advice along with examples of the sorts of posters that are, in fact, practically perfect in every way (and some not so much). Although we are focusing on NMAVS as an example, this presentation is useful for students presenting at other venues as well.
